## Certificate course English for PSC Examinations ASCEP01 2021-22

### Report and Course Outcome

The first batch of the certificate course English for PSC Examinations, ASCEP01 started on 14<sup>th</sup> July 2021. Seven sessions were conducted in room no.7 and the rest of the classes were conducted online through the platform Google meet as per the convenience of the students. A diagnostic test was conducted at the beginning of the course to understand the level of knowledge of the students. After the thirty hours of class, all the 63 students got above 90% score in the final test. Mock test conducted at the end of every week helped the students to appear for the final test. Hand outs were given to the students which helped them to do more exercises. Pair work and group work were given for better result. Certificates were distributed to all the 63 students as they secured above 90 percentage attendance as required by the course. The feedback of the course emphasises the fact that the learners were able to face various examinations of Public Service Commission after the course.

## Overview

The course will offer the students better understanding on nutritional principles and chemical properties of nutrients and other dietary components. After the successful completion of the course students will learn to prepare diet plan. Students will also get knowledge to interpret basic clinical biochemistry investigations in humans (such as body fluids) which are used for disease diagnosis and prognosis.

## Syllabus

### Module 1(5hrs)

Introduction and definition of food and nutrition. Basic food groups: energy yielding, body building and protective foods. Physiology and nutrition of carbohydrates and fats. Physiology and nutrition of proteins and water.

### Module 2(4hrs)

Fat soluble vitamins: Vitamin A, D, E, K. Water soluble vitamins: vitamin B complex and vitamin C. Minerals (Ca, Fe and iodine) and their biological functions. Composition of balanced diet and recommended dietary allowance (RDA).

### Module 3(6hrs)

Basic concepts of energy expenditure, units of energy. The basal metabolic rate (BMR) and its determination. Specific dynamic action (SDA) of foods. Planning of dietary regimes for infants, adults, pregnancy and old age.

### Module 4(4hrs)

Nutrition and brain development. Mother's milk versus formulated milk feeding. Food adulterations and precautions.

### Module 5(2hrs)

Basic concepts of Clinical Biochemistry  
Types and uses of biochemical tests. Clinical Biochemistry laboratory. Specimen collection, processing and transportation. Specimen collection, processing and transportation-II.

### Module 6 (2 hrs)

Blood cell count & anemia. Hemophilial Diseases related to carbohydrate metabolism. Diabetes mellitus.

### Module 7 (3 hrs)

Liver Function tests. Jaundice. The Kidney. Clinical enzymology. Isozymes and diagnostic tests. Enzyme patterns in acute pancreatitis, liver damages and myocardial infarction.

### Enrollment List

### Report and Course Outcome

Certificate course in Nutritional and Clinical Biochemistry was conducted direct class room mode from 1<sup>st</sup> December 2021 to 28<sup>st</sup> January 2022. All the sessions were conducted in classroom mode. During the 30 –hour course , a total of 77 students from different UG subjects participated in the program. The course on fundamentals of polymer science designed to provide students with an understanding of Nutritional and Clinical Biochemistry. The students were evaluated based on assignments, practical skill assessments and a final exam.

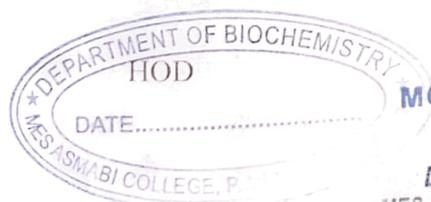

In the evaluation, it was found that all the students qualified the examination and obtained more than 80% mark, which demonstrated that, a strong understanding of course material and course design. It was found that the students had achieved the objectives of the course in various ways. Some students depicted a strong understanding of theoretical aspects of polymer science, while others demonstrated in the practical implementation of techniques.

Overall, the course was deemed successful in providing a comprehensive learning experience to the students, and they were able to apply their knowledge in different fields related to polymer science. By the end of the course, students were able to gained the desired outcomes successfully. Also a certificate of completion of the course was given to the qualified students.

Report and Course Outcome

Certificate Course in Communicative English was started with the objective of enabling the students with skills in English communication. The Course was started on the online mode during the pandemic as its relevance was more felt at that time. 30 classes were conducted with 80 students from different batches. A diagnostic test was conducted at the beginning of the course to understand the level of the knowledge of the students in English. Various methods like group discussions, pair work, role play etc were applied in order to improve the fluency in English language. Most of the students participated with great enthusiasm as they are well aware of the significance of handling the global language in the present scenario. In the final test more or less scored above 90% marks. Attendance was marked. It was completed in December 2021 and Certificates were issued to all the 80 students as they secured enough attendance required by the course. The feedback collected at the end of the course emphasizes the fact that learners were able to cross various inhibitions in English communication and also became confident to face interviews with a renewed optimism.

INTELLECTUAL PROPERTY RIGHTS (IPRs)

Course Design

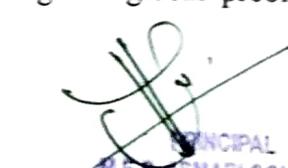

Intellectual Property Rights (IPR) have become one of the crucial issues of concern in the contemporary relations among nations. Central to such a concern has been the level of protection sought/contested on the rights rendered in recognition of the intellectual input/creativity underlying and invention or an artistic expression. The debate over IPR acquired an all-pervasive connotation in the wake of the TRIPs agreement, with the WTO at its centre. The new IPR regime that has come into being seems to have vital linkages to the revolution in the New Generic Technologies Information and Communication Technology and Biotechnology in particular. Intellectual Property (IP) is an important and effective policy instrument relevant to a wide range of socioeconomic, technological and political concerns. Our programme helps students to understand the implications of patents, copyrights, design, trademarks, and geographical Indications.

Aims and Objectives

- To bring innovation and excellence in teaching and research.
- To generate critical awareness among students, teachers and the younger generation on the correlation between technology and society.
- To promote interdisciplinary approach in teaching and research, as well as to make it socially relevant.
- To promote a high degree of awareness on intellectual property rights in general and in particular patents, trademarks, copy right, traditional knowledge and geographical indications which have become crucial concerns to society at the local, regional, national and international milieu.
- To give a direction to identify issues and concerns at local/regional/global problems through training of the required human resources.

Entrepreneurship Development in Seafood Industry

**REPORT:**

The Department of Fish Processing Technology conducted a 30 hours certificate course on "Entrepreneurship Development in Seafood Industry", from 03-01-2022 to 16-02-2022. 58 students from different domains are enrolled for the programme. Ujjwala Navas, Faculty of the department engaged the theory classes on the topic. Practical classes and industrial visit were coordinated by Sugaina Sulaiman M.S.

The titles- entrepreneurship, role of an entrepreneur in the economic development of the nation, entrepreneurial opportunities in fishery field, major considerations, licensing and steps involved in starting an entrepreneurship etc. are covered under the theory syllabus. A discussion mode of classes were arranged to grab their entrepreneurial ideas.

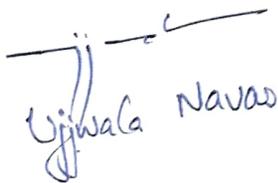

Practical sessions were carried out on the development of value added fishery products to motivate the students. An industrial visit arranged to meet the entrepreneurs in the nearby area.

Assessment and evaluation are done on the basis of the assignment provided and the project work in the development of value added fishery products and their marketing. Students scored a minimum of 70 % marks.

**Outcomes:**

- The classes helped the students to identify the entrepreneurial opportunities in fishery sector
- It helped to increase the confidence level of the students to get into a start up venture

#### Module I

##### Introduction:

- Computer programming
- Programming languages
- Compilers and interpreters
- Python as programming language

(4Hours)

#### Module II

##### Basic Python syntax

- Data types
- Variables
- Expressions and type conversion
- Defining functions
- Returning values
- Input and output statements
- Branching with if

(6 Hours)

### Module III

#### Strings ,lists,dictionaries.

- Strings
- Lists
- Tuples
- dictionaries

(4 Hours)

### Module IV

#### Loops in python

- introduction to loop
- while
- examples
- initialisation
- infinite loop and Break statement
- for and nested for loops
- errors in loops

(10 Hours)

### Module IV

#### Practical session

#### Simple programs using python

*REPORT AND COURSE OUTCOME*

The certificate course introduced by the department of physics was started on November 5<sup>th</sup> 2021. There were almost 64 students as the participants and classes were given in offline mode. The students those who interested in programming language they were actively participated in the course. The course included 30 hrs of class and after the course, all the students got 90% score in the final test. Mock test was also conducted by the department of physics which helped the students to attain good mark in the final test. And also they were able to do program itself. Certificate were also distributed to the students as they secured 85% attendance as required by the course.

**REPORT ON MUSHROOM CULTIVATION CERTIFICATE COURSE**  
**RESEARCH AND PG DEPARTMENT OF BOTANY**  
**Academic Year 2021-22**

Name of the Certificate Course : Certificate Course on Mushroom Cultivation  
Course code : ASCEP17  
Course Duration : 30 Hrs (20 Hrs Theory & 10 Hrs Practical)  
Total number of students enrolled : 60  
Mode of course conducting : offline and online classes  
Date of Introduction : 04/01/2022

The certificate course on mushroom cultivation was introduced on January 4, 2022. A total of 60 students from various academic backgrounds were admitted to the course, and all of them successfully completed the program and obtained certification. The course was conducted using a blended approach, combining online sessions via Google Meet and offline practical sessions. Practical demonstrations were conducted for bed preparation, spawning, and cropping. Both theoretical and practical classes were concluded by February 26, 2022.

The internal and external evaluations were carried out, and the results were announced on March 10, 2022. Each qualified student received a certificate of completion for the course.

**Course Outcome (Focus on Employability/Entrepreneurship):**

The course equipped the students with the necessary skills and knowledge to engage in mushroom cultivation throughout the year, be it in small, medium, or large farms, utilizing various levels of technology. Mushroom farming offers significant profit potential, even with minimal capital investment. It is an ideal business venture for individuals with limited expertise in the field of mushroom cultivation, as well as those who own suitable infrastructure for establishing a farm. The students who

received technical training in mushroom farming have gained expertise and are now well-prepared to initiate their own mushroom farming businesses.

## **Course Description**

Academic and research report writing is an essential activity for the academic community in higher education institutions. As part of the postgraduate programs, students have to submit a dissertation or project report in their last semester. Literature search and reference management are the two essential skills required in academic writing apart from writing skill. The proposed add-on course will discuss the basic concepts of literature search and reference management. This course intends to introduce the learner to various literature sources, search strategies and the norms for recording the information about sources and arranging them in the dissertation or project report. After the successful completion of the course, learners will be able to identify the required literature using different search strategies and provide proper documentation of referred sources in their research document.

## **Aims**

- Identify types of information resources available
- To understand the structure of knowledge management
- Access the required information effectively and efficiently
- Evaluate information and its sources critically
- Use the information ethically to satisfy the information need
- Documentation of the sources in the research document

## **Learning Outcomes**

Learners will be able

- To elicit the Knowledge management
- To identify the various types of resources in various formats.

- To know which bibliographic information is required to cite a source.
- To find documentation guidelines for various documentation styles.
- To know about plagiarism and software packages to detect it
- To interpret similarity reports
- To know online tools which help to conduct project effectively
- To use reference management software packages

### **Module 1: Information Resources and Knowledge management 10 hrs.**

**ACADEMIC WRITING AND REFERENCE  
MANAGEMENT**

The certificate course for Library for literature survey started on 1.11.2021 for PG students. Due to the pandemic situations all the sessions were conducted online through the platform google meet as per the convenience of the students. After the thirty hours of the class more than 90 % of the students got above 80 score in the final test. Searching and downloading techniques of journals and books are explained and practised through google meet. Certificates were distributed to all the 56 students as they secured 90% attendance as required by the course. These course helps to write easily their project work.

The taj mahal is a famous building. It is one of the wonders of the world. It is situated at Agra, on the bank of river Yamuna. It was built by shahjahan. He build it in the memory of his dear wife Mumtaz Mahal. People come from far and wide to see this historical building. It is very pleasant to see it in the rainy season. Hundred of years have passed, but its beauty is the same, as it was, when it was built.

Course English for Training and Practising in Public Speaking MESACCC202013

Report and Course Outcome

The first batch of certificate course English for Training and Practising in Public Speaking ,MESACCC202013 started on 10<sup>th</sup> July 2020. The classes were conducted in eight session through online mode. The students were asked to introduce themselves so as to have an idea about their language and speaking skills. About 82 students took part in the classes covering 30 hours. The students were given training to recognize the importance of developing listening skill along with speaking skills. Certain tests were conducted in order to evaluate the learning level of the students regarding their oral skills. The students were awarded with certificates for securing attendance above 90%. The outcome of the course was calculated by the students performance as they were able to overcome fear and stage fright to a great extent while they face a large audience in the near by future.

## Report and Outcome on Certificate Course in Mobile Short Film Making

The purpose of the report is to share my experience, knowledge and outcome of the certificate course in Mobile Short Film Making. The report concludes with a review of the course and its benefits for the institution.

Workshop started with an inauguration ceremony, addressed by Principal Dr Biju on 13th July 2021. The course focused on the advancement of mobile technology among students. Videos not only attract people, but also increase their engagement with your content. Video creates an emotional bonding with your friends, family and prospective customers. Compared to texts, videos provide volumes of information with spontaneous effect on the viewer.

This mobile filmmaking workshop is a complete course in itself, a masterclass in filmmaking, that helps you gain the skills needed for making your own videos, advertisements, reels, short films and documentaries.

### Objective:

To gain and share knowledge on Advanced Mobile short film making.

### Experience:

The training was a two months full time course from **13th July 2021 to 23rd September 2021**. The primary objective of this programme is to update/enhance the skills of students in Advanced Mobile short film making. The students may be exposed to the needs of Mobile film making industry so that they can in-turn nurture, educate and mould their career while they are still in the college.

The training methodology includes: →

- Video tutorials
- Special lecture session by external experts
- Practical Sessions
- write your own screenplay

### Outcomes:

**Total Number of students who completed certificate course : 35**

Students have gained extensive subject knowledge along with practical knowledge. Practical sessions enrich concept, and that will help students to practice Mobile Film Making in the institution.
