

ANNUAL REPORT MINORITY CELL 2020-2021

During the academic year 2020-21, the Minority Cell undertook initiatives to support students who scored low marks in English. Additionally, awareness classes were conducted to familiarize students with various financial assistance programs. Given the challenges posed by the COVID-19 pandemic, these sessions were conducted online to ensure continuity in education and support.

English Grammar Classes: Recognizing the importance of English language proficiency, especially in academic and professional pursuits, the Minority Cell organized English Grammar classes for students who struggled with the subject. These classes aimed to improve students' grammar skills, enhance their comprehension abilities, and boost their confidence in using the English language effectively. Through structured online lessons, interactive exercises, and personalized feedback, students were provided with the necessary support to overcome their academic challenges in English.

Financial Assistance Awareness Sessions: In addition to addressing academic needs, the Minority Cell conducted awareness sessions to acquaint students with different financial assistance programs available to them. These sessions aimed to empower students by providing information about scholarships, grants, and other financial aid opportunities offered by government agencies, educational institutions, and private organizations. By raising awareness about available resources, students were encouraged to explore avenues for financial support to pursue their education and alleviate financial constraints.

Online Mode Due to COVID-19: The decision to conduct both English Grammar classes and Financial Assistance Awareness sessions online was necessitated by the COVID-19 pandemic and the associated restrictions on physical gatherings. Leveraging digital platforms and virtual communication tools, the Minority Cell ensured that students could access

educational resources and participate in interactive sessions from the safety of their homes. Despite the challenges posed by the online format, efforts were made to maintain engagement, foster collaboration, and facilitate meaningful learning experiences for students.

The initiatives undertaken by the Minority Cell during the academic year 2020-21 underscore its commitment to supporting students' academic and socio-economic well-being. By providing English Grammar classes and Financial Assistance Awareness sessions online, the Minority Cell aimed to address students' diverse needs and empower them to overcome academic hurdles and financial constraints. Moving forward, it is essential to continue advocating for inclusive education and equitable access to resources, thereby ensuring that all students have the opportunity to thrive and succeed.
