In order to reduce school attendance problems and aggressive behavior and also for better avademic and personal development of childrens in society, it is Essential to determine the relationship between both variables. The aim of this study was to examine the relationship between school refusal behaviour and aggression among adolescence . The sample consisted of 100 secondary school students of Kodungallur subdistrict , aged 13–16. The School Refusal Assessment Scale-Revised and the Aggression Questionnaire were used. The method used were convineint sampling method and data were analysed through Karl Pearson correlation test. The findings found no significant relationship between aggression and school refusal behavior.

KEYWORDS: Aggression, School Refusal, Adolescence.
